Institutional Investor Presentation

October 2023

Ministerio
**de Economía
y Finanzas**

Key Credit Highlights

1

After growing strongly in 2022, economic activity is poised to slowdown in 2023, impacted by a severe drought and lower regional and global demand.

2

Steady improvement of public finances in 2020, 2021, and 2022, delivering on fiscal targets; moderate widening of fiscal deficit in the first half of 2023, driven by cyclically softer tax revenues and public infrastructure investment.

3

In the context of a significant deceleration of inflation within the target band, Central Bank gradually started reducing short-term policy rate, while holding a contractionary monetary policy stance.

4

Current account deficit is more than financed by FDI, amid real exchange rate appreciation and large international reserve buffers.

5

The government forges ahead with structural and fiscally conservative reforms, including the recent social security reform law passed by Congress.

6

Strengthening in the Government's balance sheet, through a reduction in the sovereign's debt and interest burdens and continued improvements in the currency and debt structure.

7

Uruguay becomes the top performer on ESG fundamentals among EM countries; string of recent rating upgrades and improvements in credit outlook by all five rating agencies, reflecting strong fundamentals and relatively low country risk.

After growing strongly in 2022, leading indicators suggest slower growth in 2023

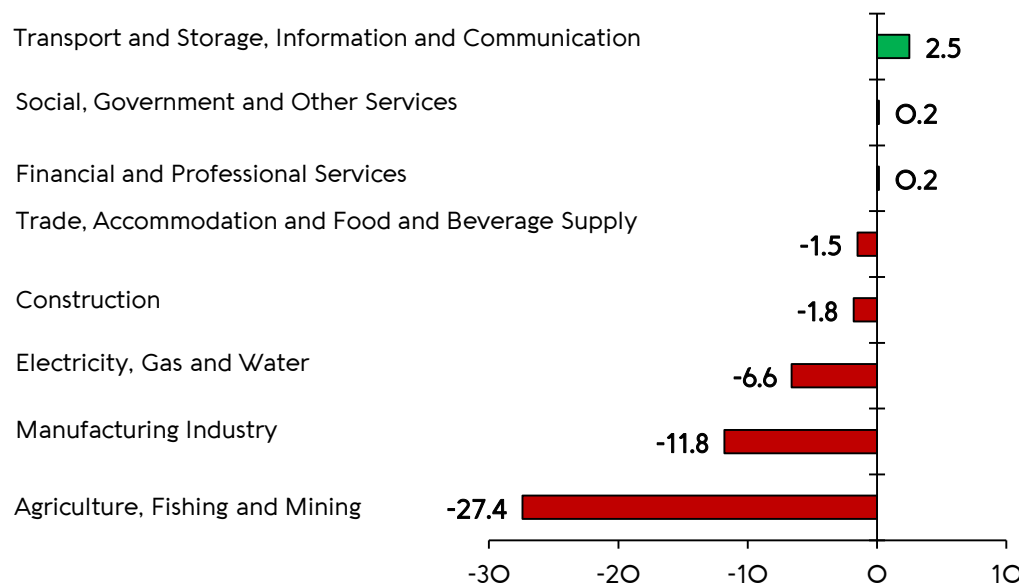

Economic activity expanded strongly in 2022, although real GDP growth has since decelerated; agriculture and industry sectors affected by the severe drought and external demand.

UPM completed the construction of the second pulp mill, on schedule, allowing them to start production operations; a large FDI project for producing e-fuels is expected to start in late 2024.

UPM's pulp mill and Central Railway project ⁽¹⁾

- The construction of the new UPM plant was completed in December 2022 and the plant began operating in April 2023.
- UPM invested a total of approximately **US\$ 3.5 billion (4.8% of GDP)** to build a 2.1 million-ton greenfield eucalyptus pulp mill in Durazno and a port terminal in Montevideo.
- **The construction of the Central Railway is still ongoing.** It will be running from Paso de los Toros city to the port of Montevideo (273 km long).

FDI net capital inflows ⁽²⁾ (Rolling 4-quarters, in % of GDP)

- On June 8, 2023, ANCAP announced a **US\$4 billion investment in infrastructure and facilities designed to produce e-fuels using green hydrogen and captured biogenic carbon dioxide**, through a joint venture with HIF Global.
- The project is expected to produce 180,000 metric tons of e-gasolines per year using 710,000 tons of captured carbon dioxide produced by ANCAP's biofuel subsidiary and 100,000 tons of green hydrogen derived from electricity generation produced from expanded wind and solar sources.
- The construction is planned to start in **late 2024**.

Fiscal discipline aligned with fiscal rule

Public finances have improved since 2020 as a result of strong commitment to fiscal discipline, and the three pillars of the fiscal rule have been met for three consecutive years (2020-2022); targets for 2023 were set in the Annual Accountability Budget bill sent to Congress in June.

Indicative target on structural fiscal balance, to account for business cycle fluctuations and one-off/temporary spending and revenue items.

Indicative target cap on real growth in primary expenditure in line with estimated potential real GDP growth

Legally binding maximum level of annual net indebtedness in dollar amount.

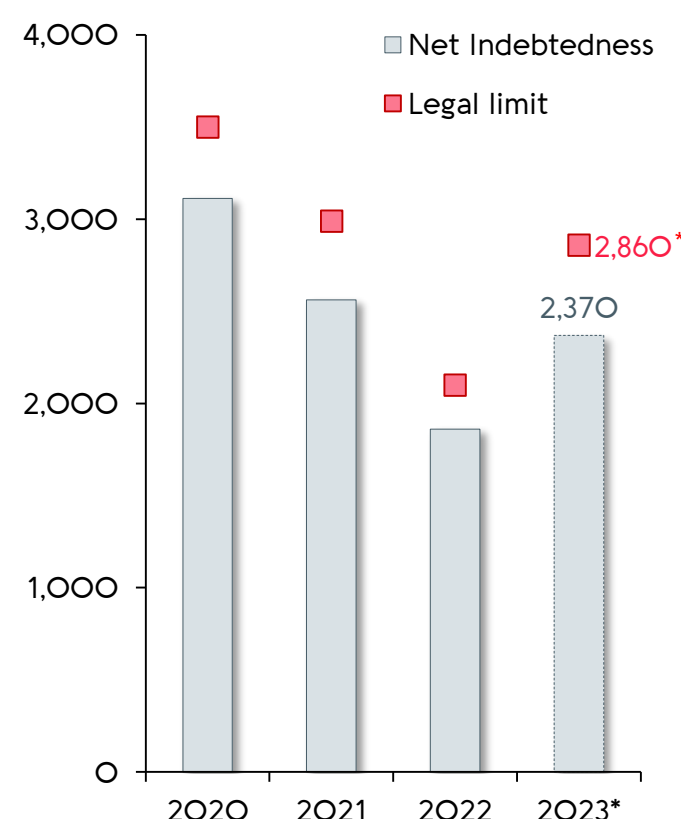

Structural balance⁽¹⁾
(In % of GDP)

Primary spending⁽²⁾
(Annual real change, in %)

Net indebtedness⁽³⁾
(USD mm)

Source: Ministry of Economy and Finance of Uruguay, based on the "Proyecto de Ley de Rendición de Cuentas 2022", submitted to Congress by end-June, 2023.

(1) Structural balance refers to the fiscal outcome adjusted for fiscal items impacted by economic cycle fluctuations and one-off/temporary spending and/or revenues.

(2) Potential real GDP growth rate for 2023 estimated at 2.1% (i.e. the indicative target for real primary spending growth is 2.1%). For subsequent years, potential real GDP growth estimated at 2.8%.

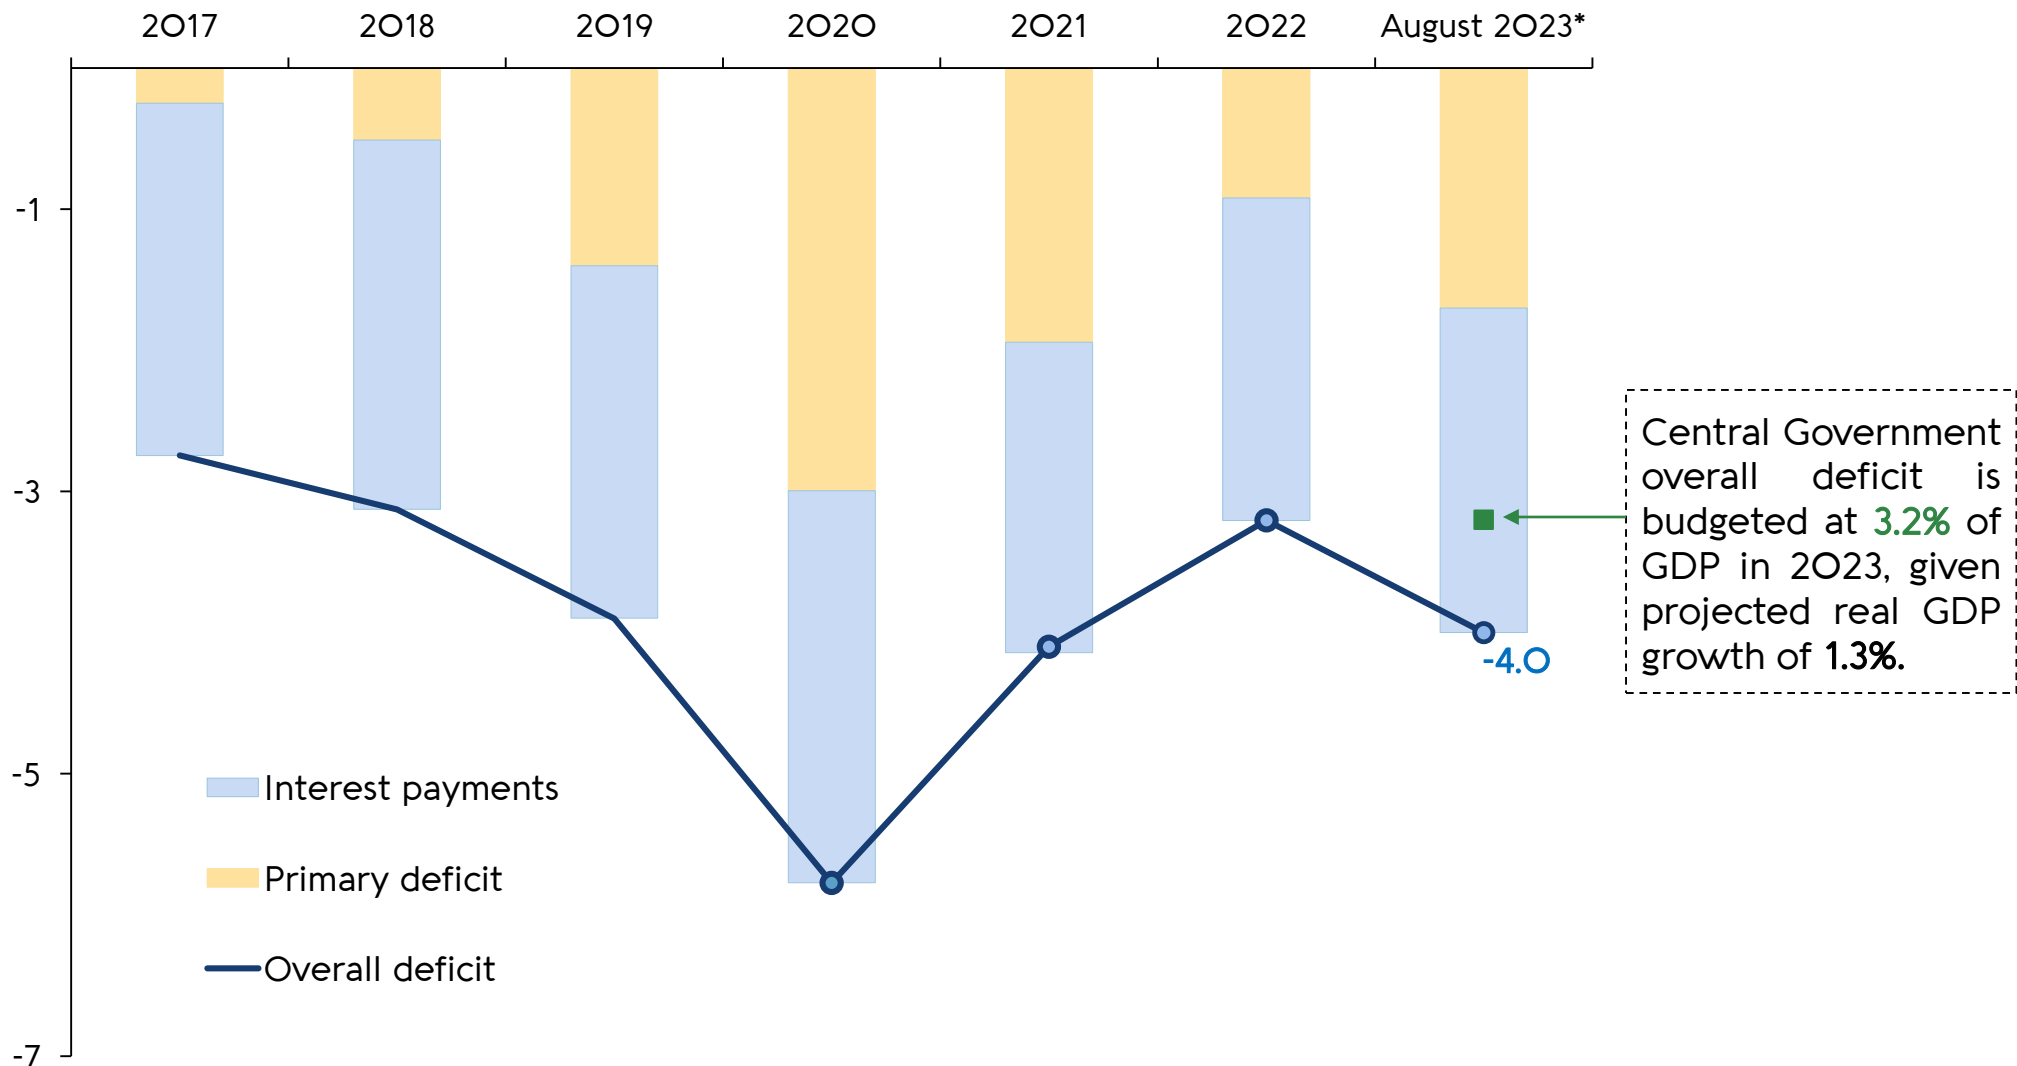

(3) For 2023, the legal net indebtedness cap was increased from USD 2,200 million to USD 2,860 million due to the water deficit emergency, invoking the use of the legal escape clause in the fiscal rule. Government Net Indebtedness is defined as gross indebtedness (bond market issuance and disbursed loans) net of amortizations of market debt and loans, and the accumulation of Central Government's financial assets, during the fiscal year.

(*) Projections for 2023.

Primary fiscal deficit has widened in 2023 — explained by an increase in public infrastructure investment and cyclically softer tax revenues.

Central Government's fiscal balance
(In % of GDP)

Source: Ministry of Economy and Finance of Uruguay and Central Bank of Uruguay, based on the Rendición de Cuentas 2022, submitted to Congress by end-June, 2023. Does not include extraordinary inflows to the Social Security Trust Fund.

(*) Last 12 months. Based on nominal GDP projection for the 12-month period ended August 2023.

Enhancing the monetary policy framework and bringing down inflation

Monetary policies focused on reducing inflation and anchoring inflation expectations within target band.

I

Commitment to lower inflation as overriding objective

II

Short-term Interest rate as policy instrument under IT regime

III

Enhanced transparency in communication

IV

Free-floating exchange rate

V

Policies for Financial de-dollarization

Headline inflation has fallen sharply (to its lowest level in 18 years), on the back of decelerating tradeable and non-tradeable inflation, unwinding supply effects from the drought and a restrictive monetary policy.

Government-led structural reforms

Government forges ahead with structural and fiscally-conservative reforms: “keeping the high-beam headlights on”.

**Urgent Consideration
(UC) Law⁽¹⁾**

**2020-2024
Budget Law**

**2021
Budget Review**

**Social Security
Reform**

Approved on
July 9th, 2020

Approved on
December 18th, 2020

Approved on
November 3rd, 2022

Approved on
April 27th, 2023

- Changes in the tax code for small businesses.
- Changes in the regulatory framework for energy markets.
- Commission of experts of the Pension Reform submitted the diagnosis on March 23rd 2021 and has 90 days onwards to present a comprehensive reform to Congress.
- Draft of new fiscal framework.

- New governance for public enterprises: performance targets and accountability.
- Environmental and ESG-focused policies (Helsinki Principles).
- Implementation of new fiscal institutionality.

- Fullfillment of the three pillars of the Fiscal Rule in 2021
- Proposes additional expenditures for three specific areas: education, I+D and citizen security.
- Provides for further public policies to foster long-term growth.

- Parametric changes to all schemes.
- Established a common system for all the schemes that exist in the country.
- Creation of an independent regulatory agency that oversees the entire regime.
- Mechanisms to encourage voluntary savings.

⁽¹⁾ On March 27th, 2022, a public referendum was held on whether to repeal, or uphold, 135 articles of the Urgent Consideration Law voted in 2020. The majority of the population (51,3%) voted in favour of upholding them.

Social Security reform is focused on long-term fiscal sustainability and improving equity of the pension system.

Social Security Reform

- The reform plans to consolidate all retirement regimes, converging into a single system. Ten years after the approval (2033) the convergence will start, with the old pension system rules weighing 50% and the new one 50%.
- The new system will gradually replace the old one, and the influence of the systems will be modified by 5% each year. So, the new system will fully take effect by 2043.
- The approved reform gradually increases the retirement age to 65 years.
- The minimum amount of worked years to retire stands at 30, although contributing for 35 or 38 years will result in early retirement at 64 or 63, respectively.
- The calculation for pensions will include the best 20 years of income.
- Allows current retirees to participate in the labor market and contribute to the pension system, alleviating fiscal pressures and expanding labor supply.
- Increases benefits for vulnerable groups improving the equity of the system.

Resilient debt structure and sustainable financing strategies

The government debt-to-GDP ratio has decreased since the onset of the pandemic shock, while debt management strategies and relative price effects have significantly reduced the dollarization of debt.

Gross and net debt stock of the Central Government

(As of end-period, in % of GDP)

Currency and maturity composition of debt

(As of end-period)

Central Government's funding needs and financing sources for 2023.

Flow of funds

(Annual, in USD million)

	2023 (*)	2024 (*)
FINANCING NEEDS	5,287	4,454
Primary Deficit ^{1/}	590	243
Interest Payments ^{2/}	1,935	2,048
Amortizations of Bonds and Loans ^{3/}	2,685	2,140
Change in Financial Assets	78	23
FUNDING SOURCES	5,287	4,454
Disbursements from Multilaterals and Fin. Instit.	450	350
Total Issuance of Market Debt ^{4/}	4,682	3,995
Others (net) ^{5/}	155	110
Memo Item : Government Net Indebtedness (GNI)	2,370	2,182

(*) Preliminary. The sum of the components may differ from the totals due to rounding.

(1) Excludes extraordinary transfers to the public Social Security Trust Fund (SSTF).

(2) Includes interest payments to the SSTF on its holdings of Central Government debt, but does not net out market price valuation gains on above-par bond issuances.

(3) For 2023, includes the obligations coming due on a contractual basis and bonds repurchased and early redeemed through August 2023.

(4) Includes bonds issued domestically and in international markets.

(5) Captures other financial sources of cash inflows for the Treasury, as well as financing operations that do not impact gross debt statistics.

Source: Ministry of Economy and Finance of Uruguay.

- Diversify sources of funding in international markets and continue broadening the investor base, particularly ESG-focused accounts.
- Keep refinancing risk contained through LM operations, precautionary liquidity buffers and contingent credit lines.
- Align sovereign funding strategies (in bond market issuance and multilateral loans) with achieving ambitious environmental targets.

Strong ESG foundations and low country risk

Uruguay is the top global performer on ESG fundamentals in emerging markets and has the lowest sovereign risk premia in Latin America.
